

El Chocolate School Basketball and Fence Repair Project

El Chocolate School is located in a remote village in Pespire, Choluteca in the southern region of Honduras. This is a very small elementary school that has a place set aside for a small basketball court, but they do not have the funds to build the court. In addition to building the basketball court this project includes repairing the fence around the school and the screen windows at the school. If time permits, the school could also use a new paint job.

Outside of School

Space for basketball court
