

# La Barranca School Project

La Barranca is a community located in Pespire, Choluteca in the southern region of Honduras. Central American Relief Efforts has been involved in the La Barranca community in the past by collaborating in the construction of a medical clinic. The elementary school in La Barranca has many needs. The following are a list of things that the La Barranca School Project would include:

1. To provide a new roof for the kindergarten and elementary school.
2. To paint the kindergarten and elementary school on the outside and inside.
3. To provide the school's sports court with goals and/or basketball nets.
4. To provide the students with fluoride treatment, toothpaste and a toothbrush, and lessons on dental hygiene.
5. To provide the students with eye screening in order to determine which students are in need of glasses.
