

URGENT: Potential Project Las Crucias Escuela

Las Crucitas Escuela

Las Crucitas is a remote village that is not easily accessible, but is located in Pespire. Because it is so remote, it does not receive much help from the government.

The elementary school in Las Crucitas has applied to receive 15 new computers from the government, but in order for them to receive these computers they will need to renovate a room that will pass the government's specifications. These specifications include: air conditioning, adequate ceilings, floors, and furnishings. Currently, the school has a roof but no ceiling, and there are bats inhabiting the room. The government will come to review the school in January, so this project is urgent. The project will include: installing an air conditioner, windows to surround the AC, and a ceiling. The entire school also needs to be repaired and painted. The kindergarten, which is separate from the elementary school, also needs window repairs and to be painted.
