

Los Curcos School Project

Los Curcos is a school in a remote village located in the southern region of Honduras in a municipality called Pespire. This school has applied to receive 15 computers from the government, but in order to be eligible to receive the computers, the school must have an adequate room in which to house the computers. The school does not have the funds to renovate a room for the computers. They have asked for our help in closing off part of their main school room and renovating it by installing ceilings, an air conditioner, and constructing a wall to close off the computer room. The school also needs to be painted on the exterior and interior.
